

Martha Kingman, FNP-C, DNP, is a Family Nurse Practitioner in the pulmonary hypertension clinic at the University of Texas Southwestern Medical Center at Dallas. She is presently serving as sub-investigator on numerous ongoing pulmonary hypertension clinical trials, and serves on several pulmonary hypertension advisory boards and steering committees. Martha is an active member of the pulmonary hypertension Professional Network and currently Vice Chair of the symposium planning committee, and has previously served on the membership and research and publications committees. She recently served on the editorial board of *Advances in Pulmonary Hypertension*, the journal of the Pulmonary Hypertension

Association. The majority of her clinical work involves follow-up outpatient care of a large group of pulmonary hypertension patients at UTSW Medical Center. Martha has published in the area of pulmonary hypertension and has spoken at several local and national conferences. Her main area of research interest involves the safety and management of side effects of prostacyclin therapies.
