

Neil J. Korman, MD, PhD

Neil J. Korman, MD, PhD, is Director of the Clinical Trials Unit and Clinical Director of the Murdough Family Center for Psoriasis, a comprehensive psoriasis research, education, and treatment program at University Hospitals Cleveland Medical Center, as well as Professor of Dermatology at Case Western Reserve University School of Medicine in Cleveland, Ohio. He earned his medical degree (1984) and doctorate in Biomedical Engineering (1982) at Case Western Reserve University. His postdoctoral training included a Medical internship and Dermatology residency at University Hospitals of Cleveland and an Immunodermatology fellowship at the National Institutes of Health in Bethesda, Maryland.

Dr. Korman holds subspecialty board certification in Dermatological Immunology/Diagnostic and Laboratory Immunology. He is a member of the American Dermatological Association, the Psoriasis Expert Resource Group of the American Academy of Dermatology, an Emeritus Member of the Medical Advisory Board of the National Psoriasis Foundation, and a member of the International Pemphigus & Pemphigoid Foundation Medical Board. Dr. Korman is the founding Director of the Regional Center for Immunobullous Diseases.

Dr. Korman has published over 180 articles in peer-reviewed journals. He has served as an associate editor of Medical and Surgical Dermatology and serves on the editorial board of the Journal of Cutaneous Medicine and Surgery and Psoriasis Forum. He is also a reviewer for numerous peer-reviewed journals. Since 1997, Dr. Korman has been the principal or co-principal investigator in more than 100 clinical trials, the majority of which involved psoriasis, including trials of all of the major biologic agents approved for psoriasis. He has also been involved in several translational mechanism of action studies in psoriasis.
