

Dr. Steven Isakoff is an Attending Physician the Gillette Center for Breast Cancer in the Department of Medicine, Division of Hematology and Oncology at Massachusetts General Hospital, and an Instructor in Medicine at Harvard Medical School. He earned his MD and PhD from the New York University School of Medicine. He completed his residency in Internal Medicine at the Brigham and Women's Hospital and his fellowship in Medical Oncology at the Dana-Farber/Partners Cancer Care program, both in Boston. After completing a three-year post-doctoral fellowship with Dr. Joan Brugge in the Department of Cell Biology at Harvard Medical School studying the basic biology of signal transduction pathways in breast cancer pathogenesis, he joined the staff at MGH as a Clinical Investigator. His research interests include the use of novel agents and biomarkers in the treatment of breast cancer, with a particular interest in Triple Negative and HER2 positive breast cancer.
