

M. Elaine Husni, M.D., MPH

Bio:

M. Elaine Husni, MD, MPH, is Vice Chair of Rheumatology, Director of Clinical Outcomes Research and Director of the Arthritis and Musculoskeletal Center in the Department of Rheumatic and Immunologic Diseases at the Cleveland Clinic. She is also Assistant Professor of Medicine at the CC Lerner College of Medicine of Case Western Reserve University. In this capacity, she is well situated to support various study designs and apply rigorous methods to improve health outcomes of patients with inflammatory arthritis.

As a clinician scientist, Dr. Husni has pursued an interdisciplinary collaborative approach focusing on the epidemiology and health outcomes of musculoskeletal and rheumatic diseases, specifically psoriatic diseases, rheumatoid arthritis (RA) and osteoarthritis. She serves as a conduit to Cleveland Clinic translational collaborators from orthopedic surgery, dermatology, cardiology, functional medicine, and genomics institute.
