

Rebecca Kruse-Jarres, MD, MPH
Medical Director, Bloodworks Northwest
Washington Center for Bleeding Disorders
Seattle, WA

Rebecca Kruse-Jarres, MD, MPH, is the director of the Washington Center for Bleeding Disorders (WACBD) at Bloodworks Northwest in Seattle, WA. She earned her medical degree at Tulane University in New Orleans, LA where she also received a master's degree in public health and tropical medicine. She completed her residency in internal medicine and fellowship in hematology/oncology at Tulane, became faculty in the Department of Medicine, and served as the associate director of the Louisiana Center for Bleeding and Clotting Disorders. Dr Kruse-Jarres holds faculty appointments in both medicine and pediatrics at the University of Washington and cares for ~900 individuals with inherited bleeding disorders across the state of Washington. She is board-certified in internal medicine, medical oncology, and hematology.

Dr Kruse-Jarres is nationally and internationally known for her work with inhibitors in acquired and congenital hemophilia and has been actively involved with several national and international clinical trials studying new treatments for this patient population. Dr Kruse-Jarres is the president of the Hemostasis and Thrombosis Research Society. She has received many honors and awards, including Best Doctors in America, Louisiana's Top Doctors, and the Greater New Orleans (GNO) Health and Service Corps Award.
