

## Shaping the Future of Myeloma Treatment

### **Joshua Richter, MD**

Assistant Professor of Medicine

Tisch Cancer Institute/Icahn School of Medicine at Mount Sinai  
New York, New York

Joshua Richter received his medical degree from New York Medical College. He completed an internal medicine residency at St. Vincent's Hospital – New York Medical College and a hematology/oncology fellowship at Yale Cancer Center, Yale University. Prior to joining the staff at the Tisch Cancer Institute, Dr. Richter served as Clinical Assistant Professor at Rutgers University and worked in the Division of Myeloma at the John Theurer Cancer Center, Hackensack University Medical Center.

Board certified in internal medicine, hematology, and medical oncology, Dr. Richter specializes in the treatment of patients with plasma cell dyscrasias, including multiple myeloma and related diseases such as amyloidosis and Waldenström macroglobulinemia. He is a highly sought presenter and lecturer on topics relating to the management of these conditions.

Dr. Richter has extensive experience with clinical trials focused on novel therapies, including antibody therapy and immunotherapy for a precision medicine approach. He has been published in numerous oncology journals, including *Blood*, *Journal of Clinical Oncology*, and the *British Journal of Haematology*.
