

Wendy Chung, MD, PhD, a clinical and molecular geneticist, is the Kennedy Family Professor of Pediatrics in Medicine and director of clinical genetics at Columbia University Medical Center. She received her bachelor's degree in biochemistry from Cornell University, her medical degree from Cornell University Medical College, and her doctorate in genetics from The Rockefeller University.

Dr. Chung directs National Institutes of Health (NIH)-funded research programs in human genetics of pulmonary hypertension, breast cancer, obesity, diabetes, autism, birth defects—including congenital diaphragmatic hernia—and congenital heart disease. She is a leader in the ethical, legal, and social implications of genomics, and leads the National Organization of Rare Disorders Center of Excellence at Columbia University. She is a recipient of the New York Academy of Medicine Medal for Distinguished Contributions in Biomedical Science and the Rare Impact Award from the National Organization of Rare Disorders, and is a member of the National Academy of Medicine and the American Academy of Physicians.
