

Robert C. Stanton, M.D.

Robert C. Stanton, M.D., is Chief of the Kidney and Hypertension Section at the Joslin Diabetes Center and an Associate Professor of Medicine at Harvard Medical School, Boston, MA. His research has focused on the essential enzyme G6PD and how its dysregulation affects the pathogenesis of many diabetic- and kidney-related diseases. Dr. Stanton serves on the Professional Practice Committee of the American Diabetes Association and is the Chair of the Chronic Kidney Guidelines Section. He is also the recipient of three honorary professorships as well as a lifetime achievement teaching award for Sustained Excellence in Teaching from Harvard Medical School.
